REPORT NOTES:

This report presents official statistics for recorded and resolved offences. The format has been revised significantly from that used in previous years. In particular, offences are grouped into different categories than previously used. This aligns with direction given by the Justice Sector Information Strategy for the whole Justice sector to categorise offences according to the Australian Standard Offence Classification (ASOC). This change does not change the total number of offences reported, just how they are grouped.

In making this change, New Zealand Police has taken the first step towards reporting crime in a way that is comparable with Australia. However, at this stage, important differences still exist that mean statistics are not yet comparable between the two countries. For example, Australian statistics only count the most serious offence on each file, whereas New Zealand reports every offence. Also, Australian statistics count victims, whereas New Zealand Statistics count offences.

Another important change in this report is that pages 11 to 20, which present long-term trends, have been completely revised. The time series has been extended from 10 to 15 years to give a longer history. Also, the measures reported include a number of the statistical indicators that Police recently began publishing provisional data on every month.

As in previous reports, statistics reported in this document are derived from the Police National Intelligence Application (NIA). These Official Statistics for Recorded and Resolved Offences present a snapshot of data in NIA relating to offences that occur within a given year, as at the date 14 days following the end of that year.

Unless the matter is minor where Police attendance is sufficient, a matter that is reported to or discovered by Police where Police believe an offence is likely to have been committed is counted as a recorded offence.

A recorded offence is counted as resolved when Police apprehend an offender and decide how to deal with him/her. (E.g. warn, prosecute, etc.)

Resolution rate is the percentage of recorded offences that are resolved within 14 days of the end of the year being reported on.

If an offence is resolved 15 days or more after the end of the year it will not appear in the Official Crime Statistics for that or any other year. Resolution Rate therefore undercounts the number of cases that Police have resolved. This phenomenon has a more marked impact for some types of offences than others, such as offences that require long investigations (E.g. many serial crimes, burglaries and murders).

When comparing 2009/2010 Statistics with previous years, the reader should also refer to "Report Notes" published in previous years' reports, as previous changes significantly affect year on year trends.

Population Data

Population data is used in this release to calculate crime rates. These data are estimated population figures as at 31 December each year. They have been derived from population estimates as at 30 June each year that have been obtained from Statistics New Zealand.

The estimated resident population is based on the census usually resident population count, with adjustments for residents missed or counted more than once by the census (net census undercount), and for residents temporarily overseas on census night.

These population estimates exclude the number of international students who are studying in New Zealand for less than 12 months.
