## REPORT NOTES:

Statistics reported in this document are derived from the Police National Intelligence Application (N.I.A) These Official Crime Statistics present a snapshot of data in N.I.A. relating to offences within a given year, as at the date 14 days following the end of that year.

An incident that is reported to or detected by Police where Police believe an offence is likely to have been committed is counted as a Recorded Offence.

A Recorded Offence is considered to be a Resolved Offence by Police when an offender is identified and dealt with. (E.g. warned, cautioned, prosecuted, etc.)

Resolution Rate is the percentage of Recorded Offences that are resolved.

If an offence is resolved 15 days or more after the end of the year it will not appear in the Official Crime Statistics for that or any other year. Resolution Rate therefore undercounts the number of cases that Police have resolved. This phenomenon has a more marked impact for some types of offences than others, such as offences that require long investigations (E.g. many serial crimes, burglaries and murders).

Legislation changes during 2009 have generally had negligible impact on total recorded crime statistics.

As previously reported, statistics for the years 2006, 2007, and 2008 within the Homicide offence class have been revised to remedy discrepancies detected as a result of an internal review of Homicide data.

The offence class description "Alcohol Offences" replaces the description "Sale of Liquor Act 1989" because that class of offences also includes possession and consumption offences under the Local Government Act and the Summary Offences Act as well as the Sale of Liquor Act. However, the offences contained within these offence groupings have not changed.

When comparing 2009 Statistics with previous years, the reader should also refer to "Report Notes" published in previous years' reports, as previous changes significantly affect year on year trends.

## Population Data

Population data is used in this release to calculate crime rates. These data are estimated population figures as at 30 June each year obtained from Statistics New Zealand.

The estimated resident population is based on the census usually resident population count, with adjustments for residents missed or counted more than once by the census (net census undercount), and for residents temporarily overseas on census night.

These population estimates exclude an increasing number of international students who are studying in New Zealand for less than 12 months.

Year	Population
2000	405,120
