[REDACTED]
[REDACTED]

Dear [REDACTED]

I am writing to you in response to your request dated 3 May 2019. You asked:

Could I please get the number of application for gun licences for the past five years - from 2019 to 2015

Could I please get that broken down into months and regions, and gender?

Could I please get applications that were accepted - broken down by months, regions & gender for the same amount of time?

Could I please get the amount of applications rejected by months, region & age for the same period?

Can I please get the reasons applications were not accepted?

Could I please largest amount time of times someone has been denied? And for what reasons? And the region they are from?

Could I please get the get the age of the oldest holder of a gun licence and also the youngest?

Anything else you could offer me about this topic would be appreciated.

The firearms licences by application month, year, gender, the person's current address Police District, the person's gender, the person's age at application, and the status of firearms licence application are provided in the attached spreadsheet.

You will note that the youngest age group is 15-19 years – this is because some people apply for their licence at 15, ahead of their 16th birthday. No one can be issued a licence until they turn 16 years old.

Police National Headquarters

180 Molesworth Street. PO Box 3017, Wellington 6140, New Zealand.
Telephone: 04 474 9499. Fax: 04 498 7400. www.police.govt.nz

The licences have been granted, refused, or other. 'Other' can be licences that are still being processed, licences that were surrendered before the application was finalised, or licences that were cancelled. Please note that this is not the current status of the licences – some may have been granted, but later revoked, surrendered, or cancelled.

The Police District of each licence holder is based on the address that the firearms licence holder has provided as their home address. There are some instances where the address is not directly geocoded to a District and these are shown as Not Geocoded. Police still have the address of each individual, but it would require substantial collation to attribute each one to a District. This Not Geocoded number also includes any individuals who are currently overseas but maintain their New Zealand firearms licence.

The largest number of times a person has been refused cannot be provided because applications are not standalone pieces of data – rather, each person has a licence (which can be refused or active). If the person later re-applies, then that licence would no longer be refused, but it would be pending (and later active or refused again). This question is refused in accordance with section 18(g) of the Official Information Act 1982 as the requested information is not held.

The reasons applications are refused can be summarised by "the person is not fit and proper" – this can range from lack of references, to failing to provide adequate security, to criminal history and associations. The reasons for refusal for each licence are not recorded in structured fields and may not always be recorded centrally. This question is refused in accordance with section 18(f) of the Official Information Act 1982 as the requested information cannot be made available without substantial collation or research. In arriving at this decision, I have first considered whether fixing a charge and/or extending the time for response would enable the request to be granted.

You have the right to seek an investigation and review by the Ombudsman of these decisions.

Of all the active firearms licence holders, the youngest person is 16 years old and the oldest person is 106 years old, as at 19 July 2019.

For your information, Police has developed a process for proactive release of information, so the anonymised response to your request may be publicly released on the New Zealand Police website.

Yours sincerely

Mike McIlraith
Acting Superintendent
Arms Act Service Delivery Group
