Ngā Pirihimāna o Aotearoa

# ***Tactical Options: Supplement***

***Police Shootings 1916 – 2021***

*The purpose of this supplemental report is to provide transparency about shootings by NZ Police as far back as records allow. No police officer ever wants to be in the position of deciding whether they need to discharge a firearm at a member of the public, but it is a responsibility they bear in fulfilling their duty to maintain law and order and to keep people safe.*

*A substantial number of requests for Official Information focus on police shootings; this list is intended to address the high level of public interest surrounding these incidents. While addressing the public interest, we must also be respectful of all the people involved in these incidents, and their right to privacy. In balance, this list includes the key details that most OIA requests focus on.*

# Shootings by Police

1916 – 2021

---

## Notes

### Data Accuracy

The information included in this list is the most accurate available at the time of reporting. The list has been updated to 31<sup>st</sup> August 2021. Efforts have been made to correct any identified errors, however inaccuracies may still exist.

### The Fatalities and Shooting Injuries Database

Historically, fatalities and shooting injuries have not been recorded in TOR data, primarily because these events are subject to detailed and established investigative processes. However, because the team responsible for monitoring, analysing, and reporting on TOR data are not involved in these investigations, there were implications for the prompt and ready visibility of fatalities and shooting injuries for reporting purposes. Given that these uses of force result in more serious—potentially fatal—injuries, these events are essential to a comprehensive understanding of the use of force environment. In July 2017, NZ Police made changes to its reporting policies and introduced the *Fatalities and Shooting Injuries database* to enable the prompt reporting of high-level details about these events, and to improve the quality and completeness of data in this area of reporting. From 2018 onwards, this data has been incorporated into the TOR annual report.

### Incident Type Information

Officers select an incident type that best describes the nature of the incident at which tactical options were used. Because shooting incidents prior to July 2017 were not reported in a centralised database, available details have been compiled from other information sources. As a result, the type and format of information prior to 2017 is not standardised, and some information is missing. For these earlier records, information in the column “Incident Type” has been evaluated based on interpretation of the available information, and may not be consistent with how it would have been reported by the officers involved. All other records are based on the information provided by the reporting officer/supervisor.

### IPCA Independent Investigations: Public Reports

The IPCA is notified about any event that involves a serious injury or fatality. Where available, links to the public reports from IPCA independent investigations have been provided—these reports contain much more detail about the context and circumstances of each incident than is possible to provide in this list.

### Ethnicity Classifications

Ethnicity terms and classifications are based on the Statistics New Zealand Statistical Standard for ethnicity (ETHNIC05 v2). MELAA refers to Middle Eastern, Latin American and African.

### Definition

*Fatal – cause unconfirmed* refers to incidents that resulted in the death of the subject, however the coroner has not been able to confirm whether the fatality is attributable to shots fired by the police.

# Shootings by Police
