

Wastewater drug testing in New Zealand: Quarter 1 findings

Police District overview

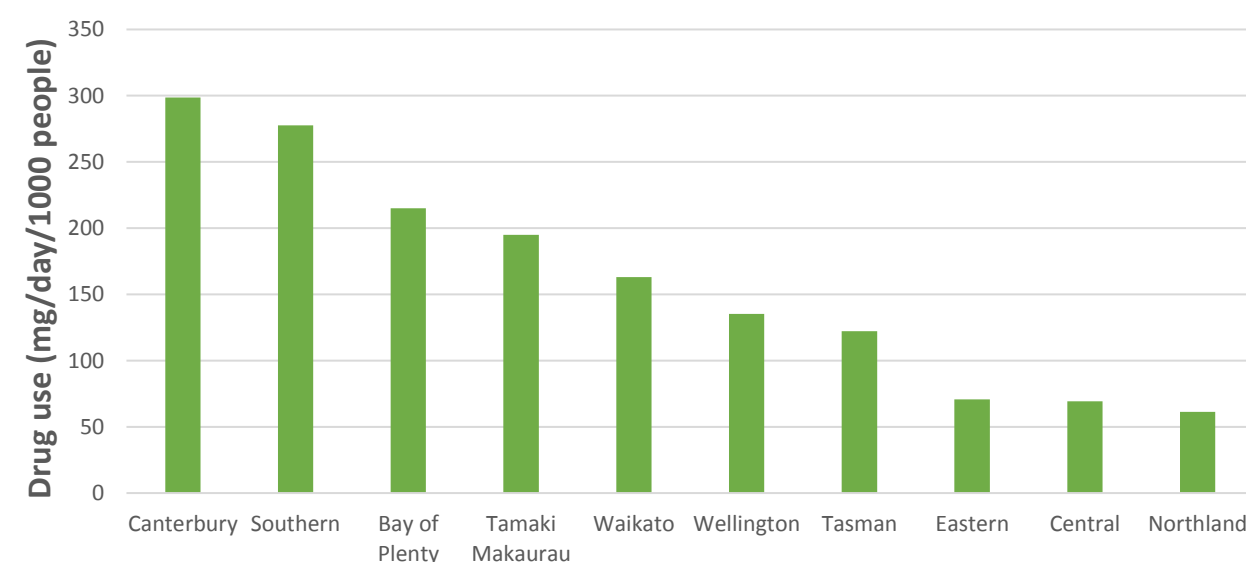

Notes: (1) Graphs below illustrate average daily drug use per 1,000 people which enables relative comparison between Police Districts.
 (2) Tamaki Makaurau (Auckland) Police Districts were combined due to the vast overlap in wastewater catchment areas.
 (3) Baseline usage across drug types and sample regions is unclear at present, but will become evident in due course as testing continues. Therefore, cautious interpretation is advised.

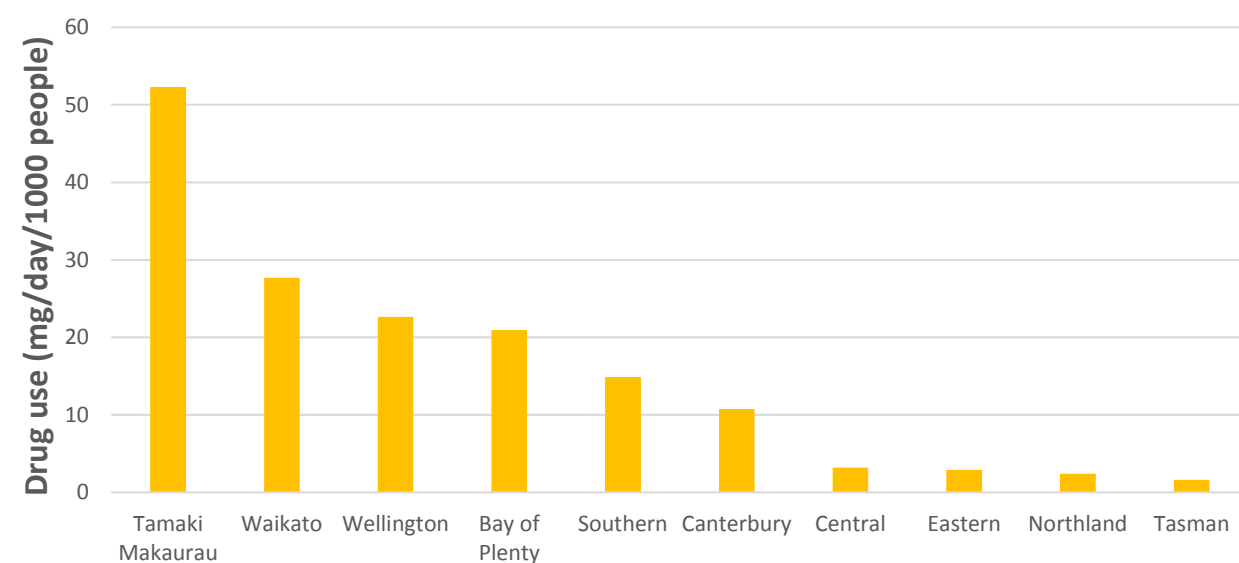

Methamphetamine: Prevalence per capita

MDMA/Ecstasy: Prevalence per capita

Cocaine: Prevalence per capita

Fentanyl: Prevalence per capita
