

Wastewater drug testing in New Zealand: Quarter 2 findings

Police District overview

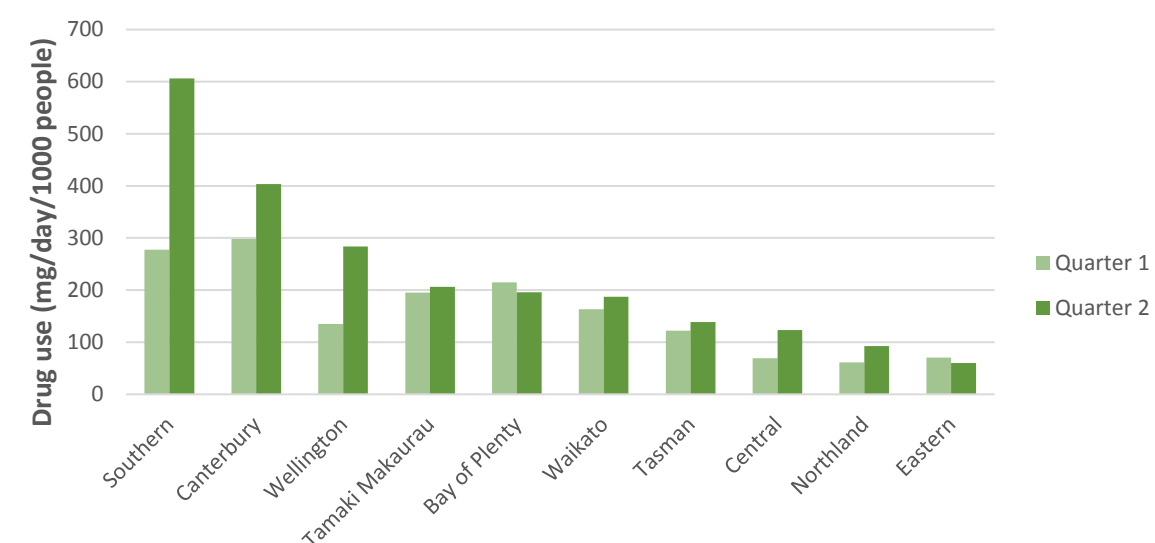

- Notes: (1) Graphs below illustrate average daily drug use per 1,000 people which enables relative comparison between Police Districts.
 (2) Quarter 2 covers the three-month period between February and April 2019, whereas quarter 1 covered November 2018 to January 2019.
 (3) Tamaki Makaurau (Auckland) Police Districts were combined due to the vast overlap in wastewater catchment areas.
 (4) Baseline usage across drug types and sample regions is unclear at present, but will become evident in due course as testing continues. Therefore, cautious interpretation is advised.

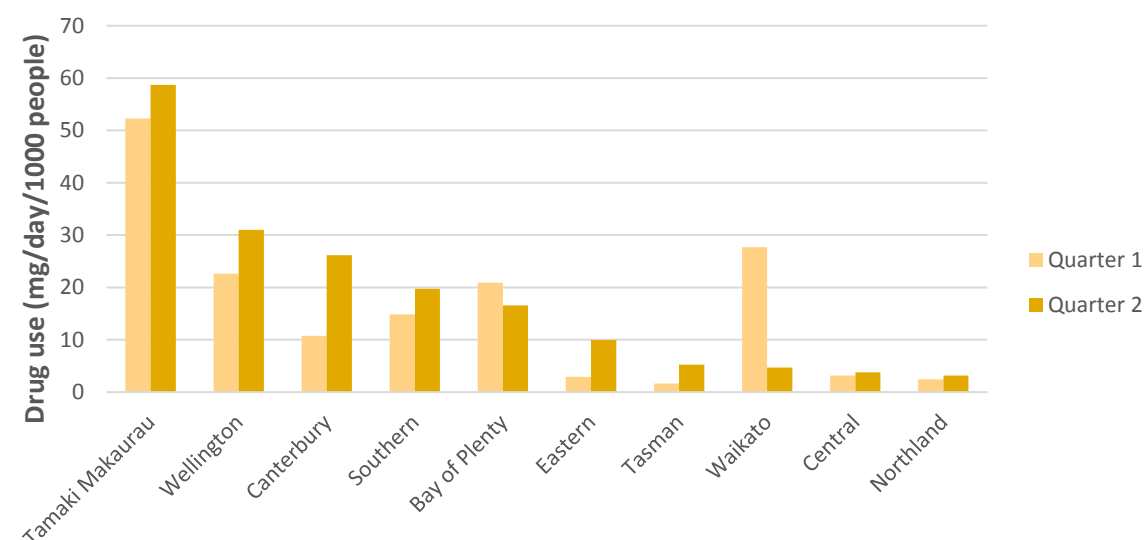

Methamphetamine: Prevalence per capita

MDMA/Ecstasy: Prevalence per capita

Cocaine: Prevalence per capita

Fentanyl: Prevalence per capita
